Note: Can sizes are presented as a three-digit number by a three-digit number. The first three-digit number is the diameter, the second is the can height. Each three-digit number is a repetition of the can's actual measurements. The first digit represents the full inches of the can's size and the second and third digits represent the fractional remainder of the can's size in 1/16 of an inch increments.

Example:

Diameter x Height
 202 = 2 2/16" x 305 = 3 3/16"
 Full inches 16th of inch

Aerosol Test Bath Rails

The all-stainless-steel Aerosol Test Bath Rails can be used to carry pressurized aerosol cans through a heated liquid to check for leaks and other problems.
