meTRON 07 CI Metal Detector with Checkweigher

- Fully integrated MD and Weigh Cell with single point operation
- 15.6" Touch screen
- Rates up to 250 PPM up to +/- .1-gram repeatability
- 3 belt widths available 150mm, 250mm, 350mm – up to 600mm in length
- 07 CI coil for optimum performance
- Standard coil widths of 250mm, 350mm, 450mm – height dependant on product
- IP 65 overall – IP69K option available
- Fully password protected
- On board USB
- Audit logging of all events
- Reject options – Air blast, pusher arm, other option available
- Dual reject bins for proper auditing of metal and weight rejections
- Key switch locking bin doors – Standard (Automatic interlocking bin doors are optional)
- Bin full indication – standard on all units
- Reject confirmation – standard on all units

Weigh Cell Specific Details:

- EMFR technology – Electro-Magnetic Force Restoration
 - Achieve higher resolution and repeatability with short measuring times – much faster and accurate than traditional strain gauge load scales
